Stoughton Utilities

600 South Fourth Street
P.O. Box 383
Stoughton, WI 53589-0383

Serving Electric, Water & Wastewater Since 1886

PUBLIC NOTICE TO ALL WASTEWATER CUSTOMERS OF STOUGHTON UTILITIES

The City of Stoughton Common Council approved an adjustment to wastewater retail rates, effective January 1, 2015. The adjustment is necessary in order to recover costs of capital infrastructure improvements, including the recent wastewater treatment facility electrical upgrade and anaerobic digester mixing project. The last wastewater rate adjustment occurred in July of 2007.

The adjustment will result in an overall increase in revenues of 2.74%. Since wastewater charges are based on metered water consumption, the impact of the rate adjustment upon individual customers will vary depending on water meter size and volume consumption. A family consuming 10,000 gallons of water per month would see an increase of $.70 on their monthly wastewater charge.

Customers will first see the rate change on their bill dated February 8, 2015 covering January wastewater service. For more information, please contact Stoughton Utilities at 608-873-3379.
