### **Stoughton Utilities recognized as a “Clean Energy Champion”**

Stoughton Utilities was recently recognized as a Clean Energy Champion by Wisconsin Clean Cities, a nonprofit organization that strives to reduce emissions and encourages the use of alternative fuel vehicles. “Stoughton Utilities is pleased to support a cleaner energy future for the state of Wisconsin,” said Robert Kardasz, Utilities Director. “This is a great program that not only advances clean energy vehicle technologies in the state, but also gives us the opportunity to own and operate our own green vehicles and maximize our fuel economy by reducing emissions.”

Stoughton Utilities is a partner in Wisconsin’s Clean Transportation Program and in 2010 was awarded \$200,000 to invest in two plug-in hybrid electric utility line trucks. Stoughton Utilities also owns a plug-in hybrid electric and neighborhood electric vehicle.

Customers interested in learning more about Stoughton Utilities’ clean transportation program can contact Stoughton Utilities at (608) 873-3379 or at [www.stoughtonutilities.com](http://www.stoughtonutilities.com).

###

Founded in 1886, Stoughton Utilities serves electric customers in Stoughton and the surrounding area; and wastewater and water customers in Stoughton.
