### **Stoughton Utilities Stresses Importance of Resilient Water Infrastructure During Drinking Water Week 2025**

Stoughton Utilities is joining communities across North America in celebrating Drinking Water Week, May 4-10, 2025. This annual observance led by the [American Water Works Association](#) (AWWA) serves to highlight the importance of healthy drinking water and recognize the tireless efforts of water professionals who keep it flowing around the clock in our communities.

“Drinking Water Week is a time to celebrate the incredible journey of our water, from source water to treatment to our taps,” said AWWA CEO David LaFrance. “This year, we invite communities to explore the science and recognize the dedicated professionals behind our water, who ensure every drop meets the highest standards of quality and safety.”

Stoughton Utilities is observing Drinking Water Week by encouraging consumers to learn about the critical infrastructure that transports water from collection to treatment to consumers to ensure access to safe drinking water. The estimated two million miles of water mains across North America are aging, and increased investment is necessary to assure they can reliably deliver safe water to homes and businesses.

To celebrate the week, water utilities, water organizations, government entities, environmental advocates, schools, and others throughout North America will help children and consumers of all ages understand how water is protected, cleaned, and delivered throughout their communities. Water utilities and others mark the occasion by hosting engaging events like educational fairs, contests, facility tours, interactive demonstrations and more.

###

The Stoughton Water Utility was founded in 1886 and has been providing the City of Stoughton with clean, safe drinking water for over one hundred and thirty nine years.

### **About Drinking Water Week**

For several decades, AWWA and its members have celebrated Drinking Water Week, a unique opportunity for both water professionals and the communities they serve to join together in recognizing the vital role water plays in daily lives. Free materials for download and additional information about Drinking Water Week are available on the Drinking Water Week [webpage](#).
